

Front-End Adjustments

1. Company Branding Visibility

- Please **increase the size and prominence of the company name (CySmart.ai)** so that it appears clearly and professionally.
- Also, make sure the **company logo/icon is larger and more visible**. It currently looks too small and subtle.

2. Change Button Labels

- Change the "**Demo**" button label to: Incremental Scan
- Change the **main center scan button** label to: New Scan

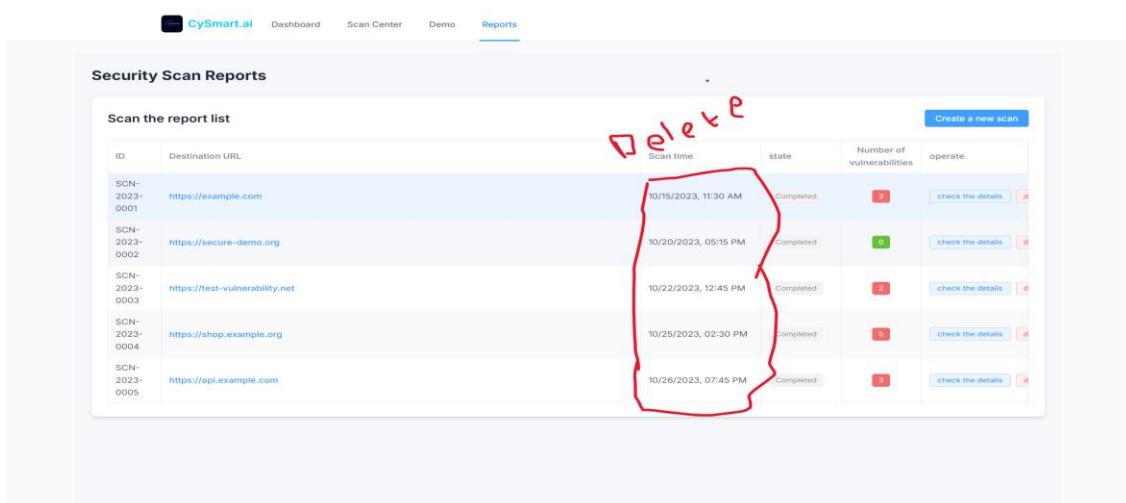

The screenshot shows the 'Safety dashboard' interface. At the top, there is a navigation bar with the 'CySmart.ai' logo, 'Dashboard', 'Scan Center' (which is highlighted with a red box and a red arrow), 'Demo', and 'Reports'. Below the navigation bar are four summary cards: 'Total scans' (8), 'Active scans' (0), 'Vulnerabilities' (9), and 'Fixed' (5). A 'Refresh data' button is located in the top right corner of the dashboard area.

Reports Section Fixes

3. Remove Default Reports

- On the initial load of the "Reports" page, there are some default reports shown — **please remove them** (not the previous reports just the default one should be removed).

The screenshot shows the 'Security Scan Reports' page. At the top, there is a navigation bar with the 'CySmart.ai' logo, 'Dashboard', 'Scan Center', 'Demo', and 'Reports' (which is highlighted with a blue underline). Below the navigation bar is a section titled 'Scan the report list' with a table. The table has columns: ID, Destination URL, Scan time, state, Number of vulnerabilities, and operate. The first five rows of the table are highlighted with a large red box and a red 'Delete' annotation. A 'Create a new scan' button is located in the top right corner of the report list area.

ID	Destination URL	Scan time	state	Number of vulnerabilities	operate
SCN-2023-0001	https://example.com	10/15/2023, 11:30 AM	Completed	3	check the details id
SCN-2023-0002	https://secure-demo.org	10/20/2023, 05:15 PM	Completed	0	check the details id
SCN-2023-0003	https://test-vulnerability.net	10/22/2023, 12:45 PM	Completed	2	check the details id
SCN-2023-0004	https://shop.example.org	10/25/2023, 02:30 PM	Completed	3	check the details id
SCN-2023-0005	https://api.example.com	10/26/2023, 07:45 PM	Completed	3	check the details id

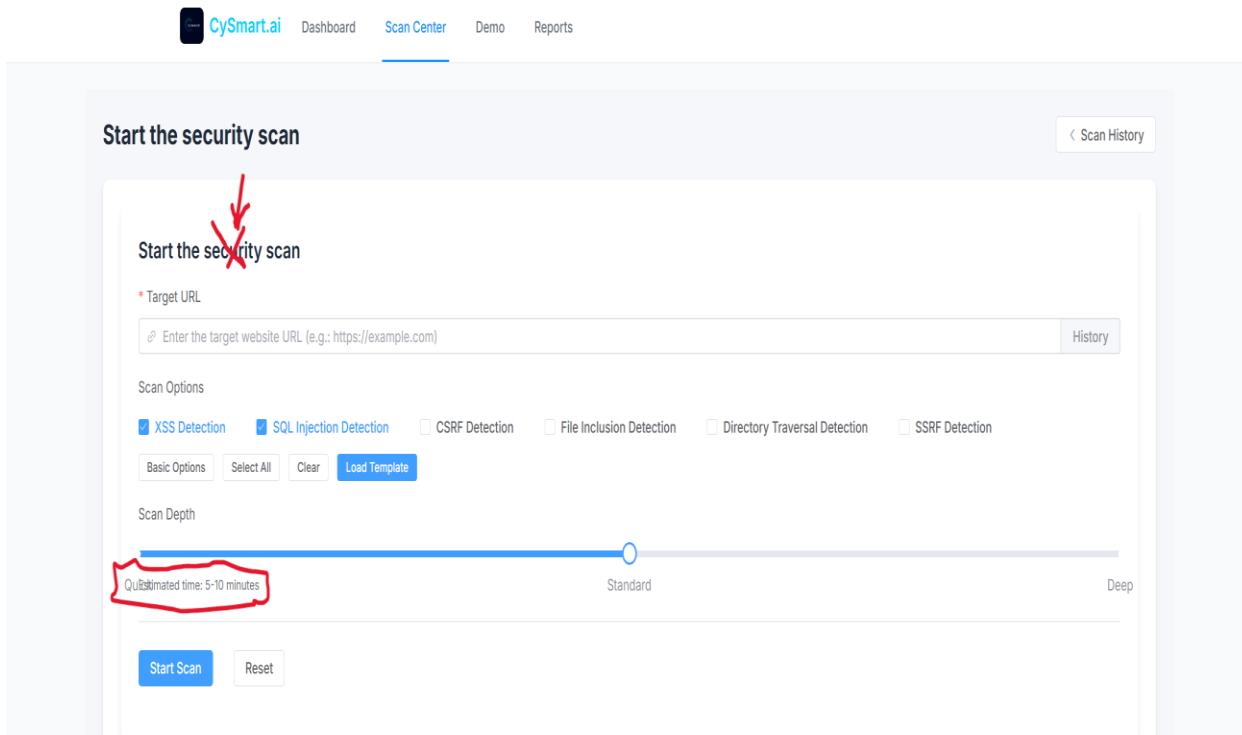

4. Save New Scan Results (important)

- a. After performing a scan, the **results are not being saved or listed under the Reports section**. This needs to be fixed:
 - i. The **latest scan report should automatically appear in the Reports tab** once the scan is complete.

Text Cleanup

5. Scan Page Text

- a. On the main scan page, update the text:
 - i. Use: **“Start the scan”** instead of “Start the security scan to start the scan” (remove the word “security”).
 - ii. There is a **text overlap issue** inside the red circle — the text **Quick** and **Estimated time: 5-10 minutes** are overlapping and look messy. (you should put new line between them), see the image below.

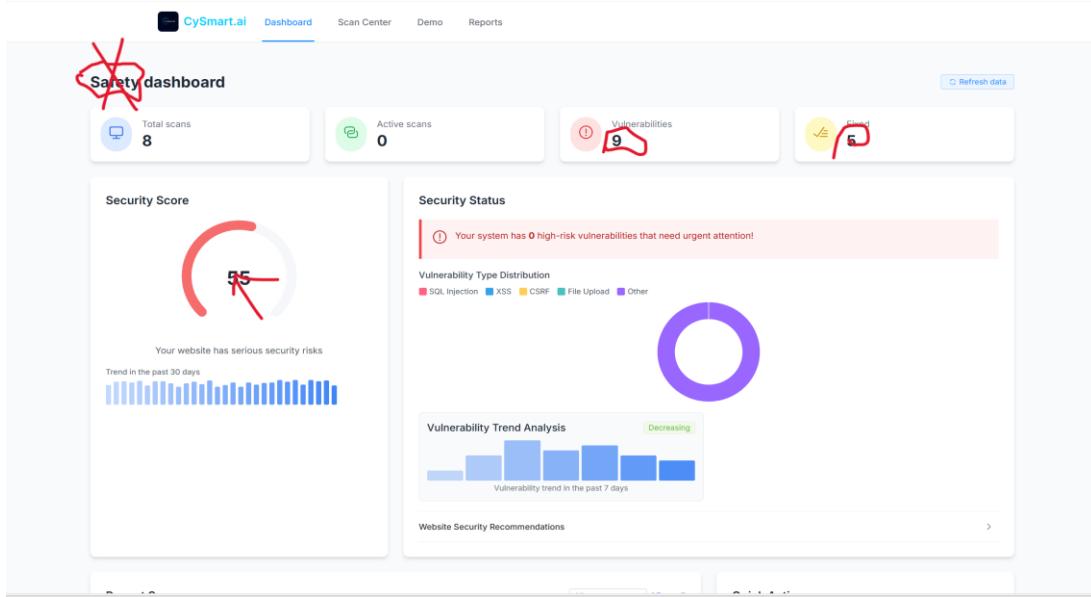

The screenshot shows the CySmart.ai Scan Center interface. At the top, there is a navigation bar with the CySmart.ai logo, Dashboard, Scan Center (which is highlighted in blue), Demo, and Reports. Below the navigation bar, the main title is "Start the security scan". On the left, there is a "Target URL" input field with the placeholder "Enter the target website URL (e.g.: https://example.com)". To the right of the input field is a "History" button. Below the input field, there are "Scan Options" with checkboxes for XSS Detection (checked), SQL Injection Detection (checked), CSRF Detection (unchecked), File Inclusion Detection (unchecked), Directory Traversal Detection (unchecked), and SSRF Detection (unchecked). There are also buttons for Basic Options, Select All, Clear, and Load Template. Under "Scan Depth", there is a slider with a red box highlighting the text "Quick" and "Estimated time: 5-10 minutes" which are overlapping. The slider has positions for Standard and Deep. At the bottom, there are "Start Scan" and "Reset" buttons.

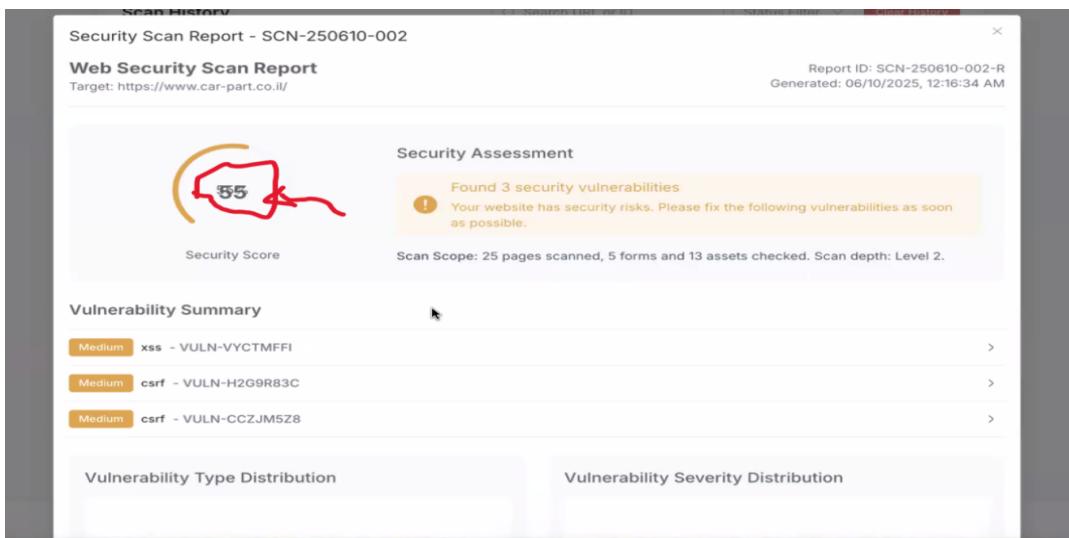

6. Dashboard Page Header

- a. In the header of the Dashboard page:

- i. Change “Safety Dashboard” to just “Dashboard”
- ii. Make sure all the default old scans will be removed from the dashboard also.

7. There's another **text overlap issue** in the scan report view. After completing a scan, when opening the **report details**, the **Security Score number overlaps with the background arc**, as shown in the attached screenshot.

8. Generated Report - When we generate the report, please apply the following changes:

1. Move the recommended fix under each vulnerability entry.

- It should appear directly below the description of the issue, not separated at the bottom.

2. Replace the word “Remediation”

- Use: “Recommended Fix” instead — it’s clearer and more user-friendly.

3. Fix the company branding

- Add our company name and logo properly at the top of the generated report.
